

TECH INTERVIEW

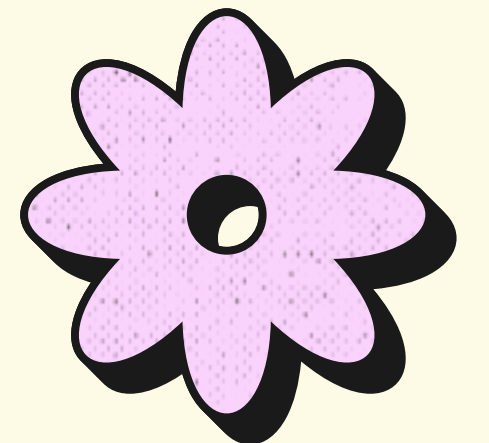

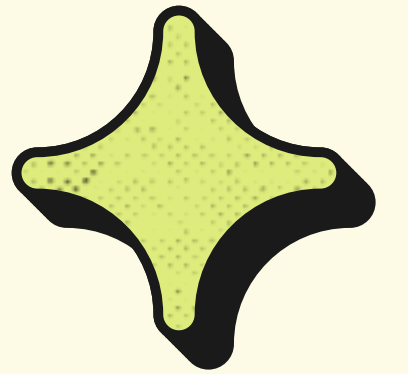

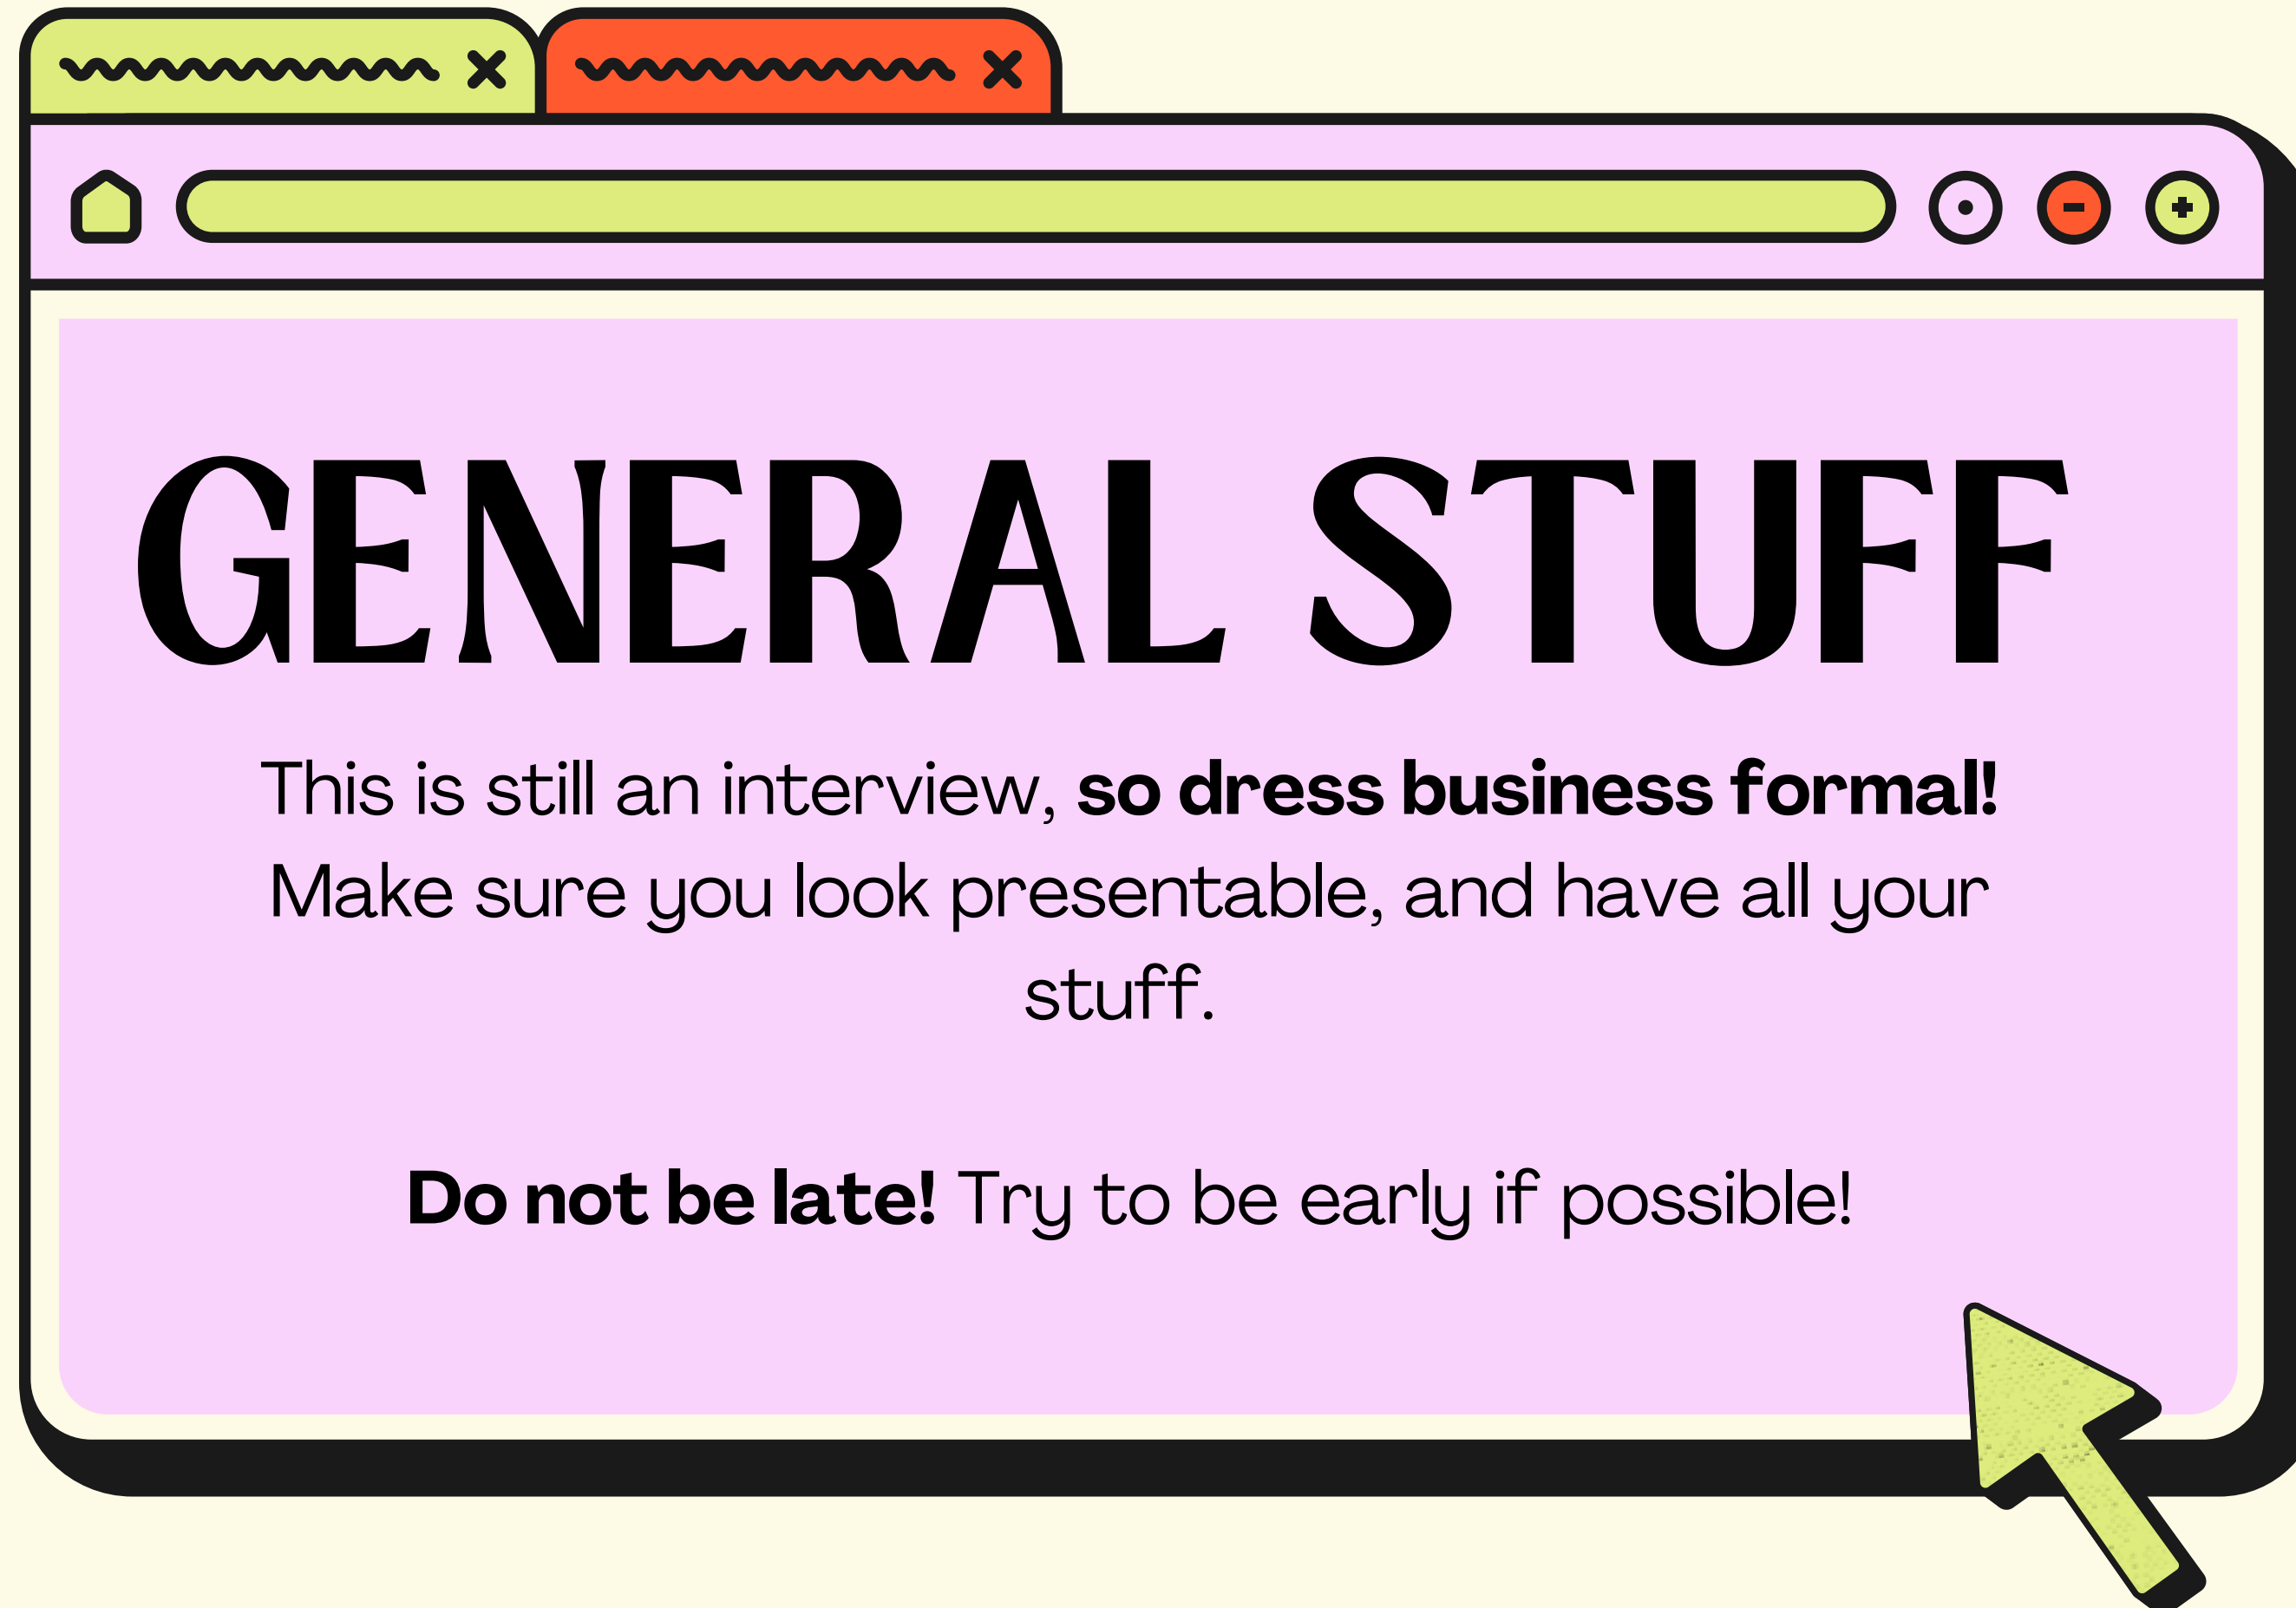

HOW TO NAIL IT!

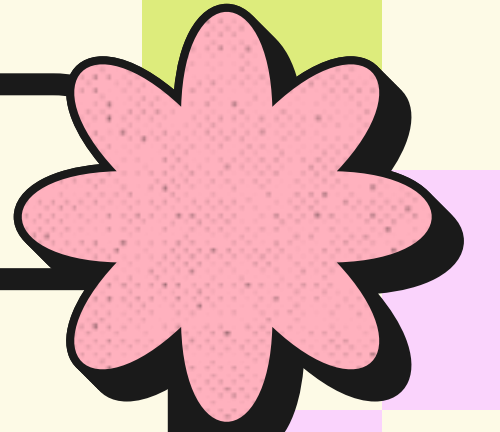

By Girls who Code @ UCA

#LETS GO!

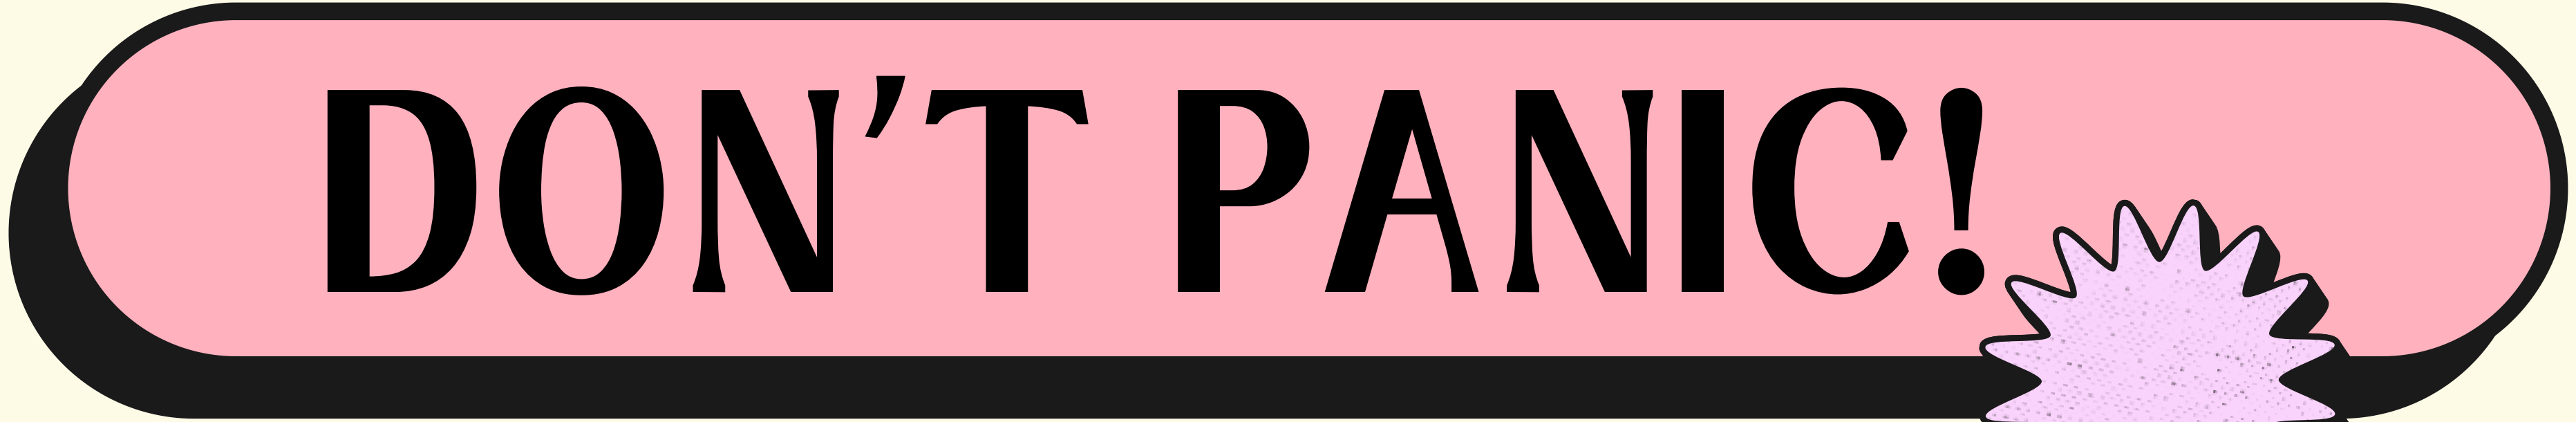

THE INTERVIEW

Imagine you're sitting down and getting ready to do a technical interview.

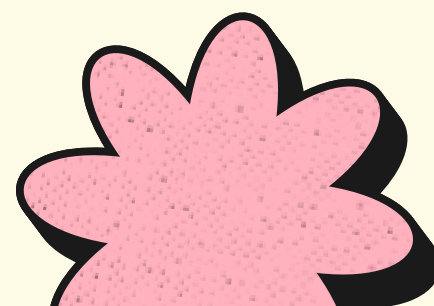

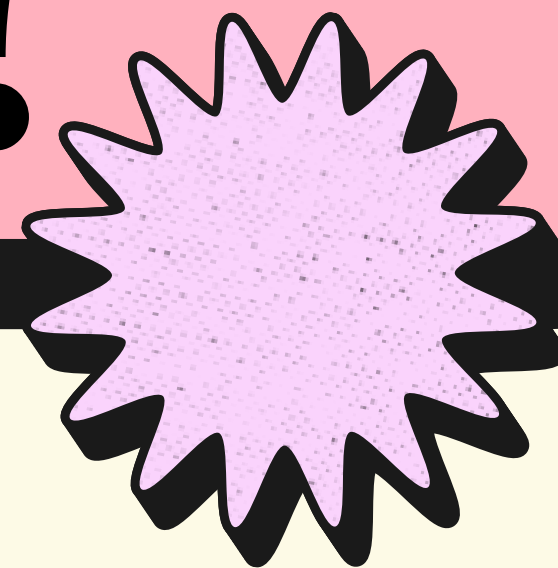

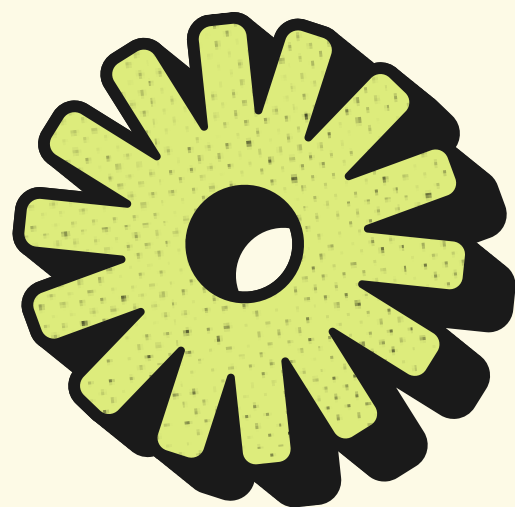

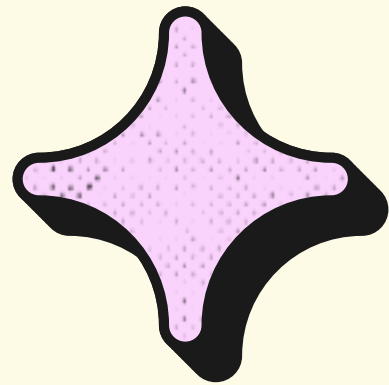

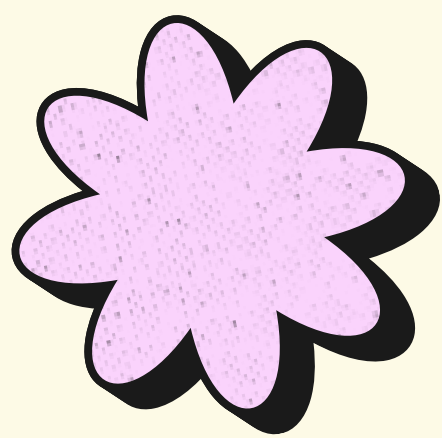

You're nervous, and all of sudden they ask "How would you implement this API?" You have no idea what that is, or how to do it!

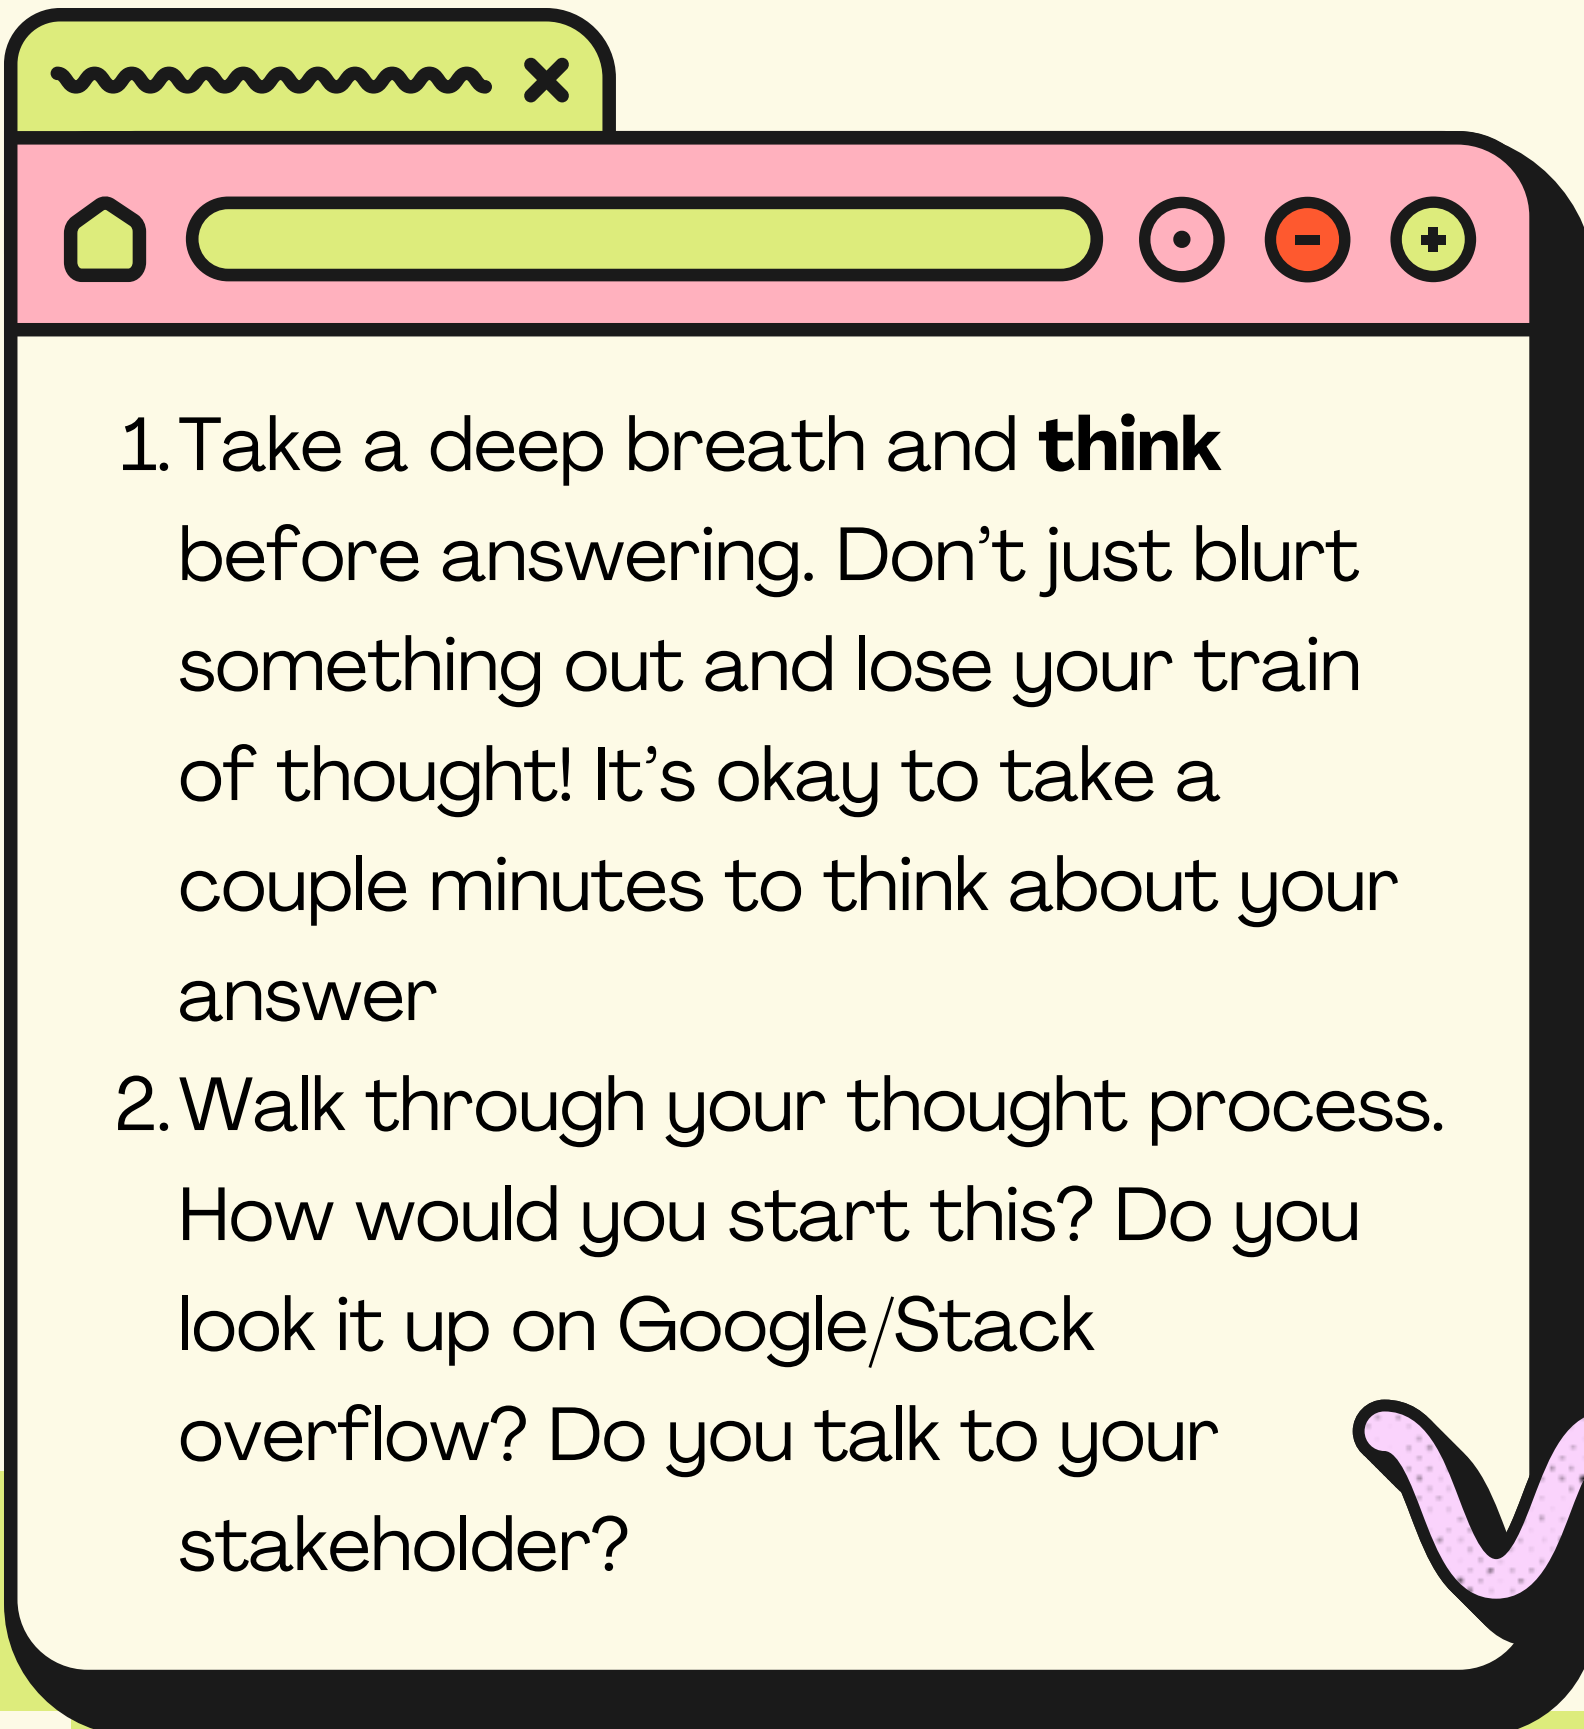

What do you do?

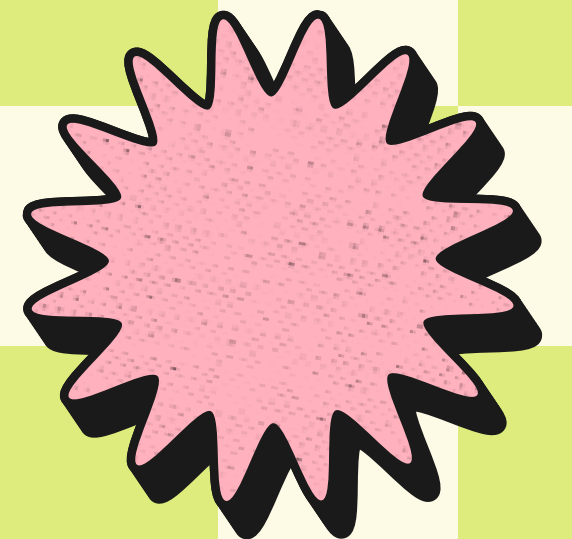

DON'T PANIC!

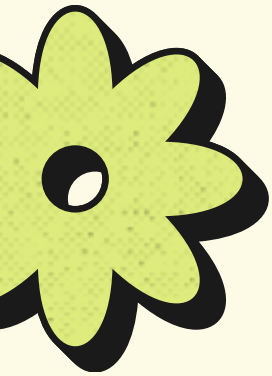

THE START

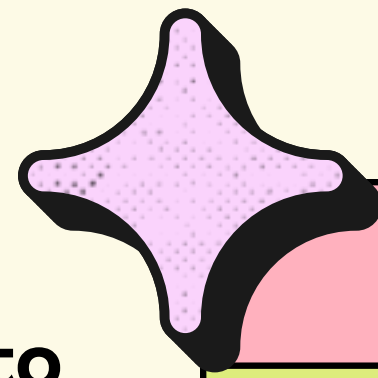

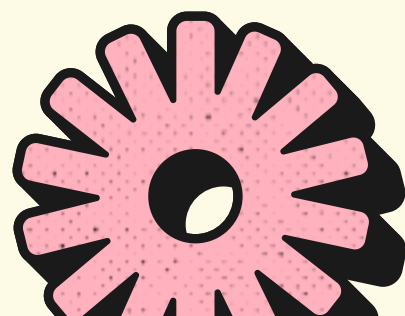

How do we come up with our answers?

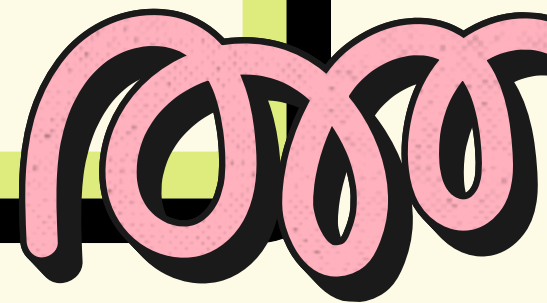

- Be honest! **Do not lie and pretend to know.** It's easy to tell if you're bluffing, **especially** when your interviewer is likely an expert or already has a relative idea.
- Stress your willingness to learn. Say "I'm not sure, **but** I would begin by learning or using resources like..."
- Feel free to ask! Ask questions like "Oh! I never heard that. What is it?"

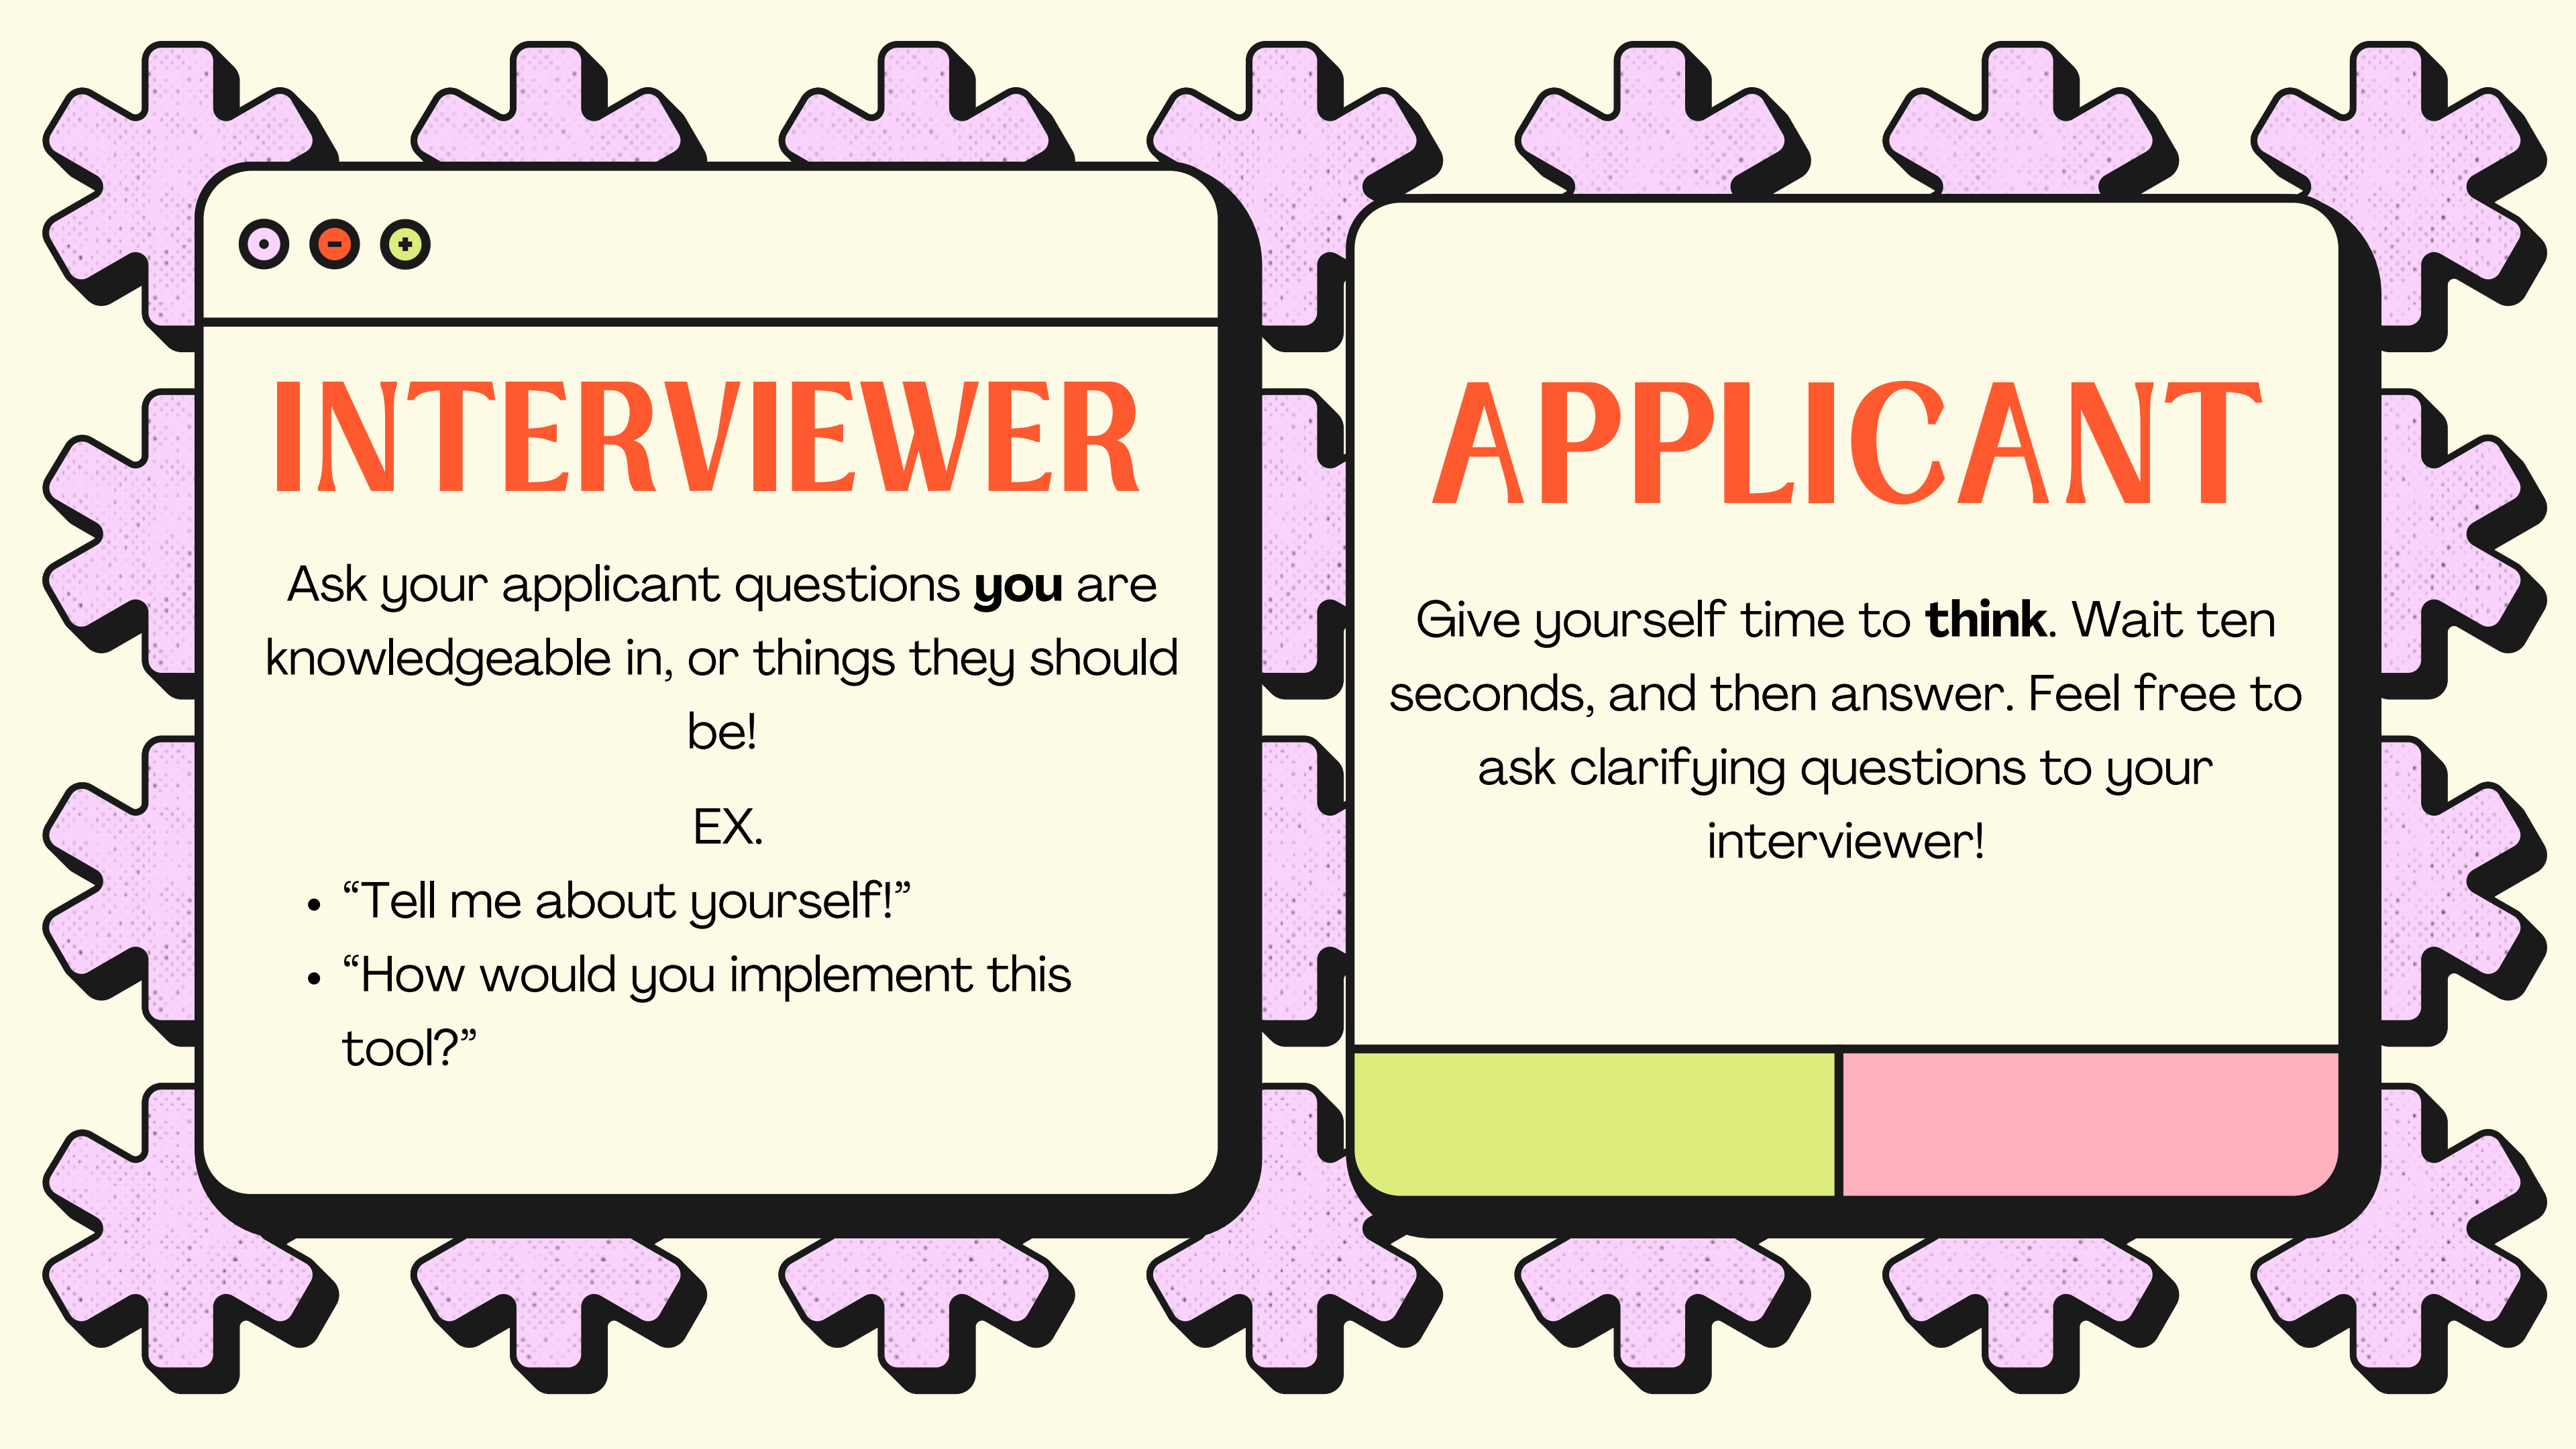

Sometimes, they test if you will just say you are stuck, and need help.

**"WHAT IF I
DON'T
KNOW?"**

INTERVIEWER

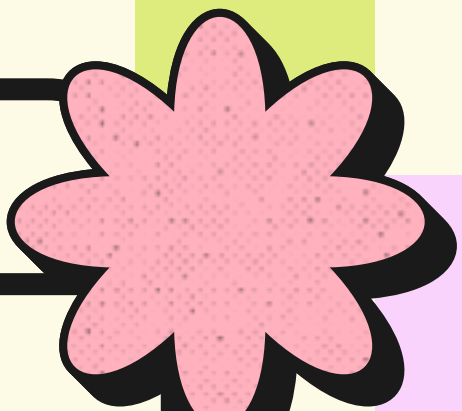

Ask your applicant questions **you** are knowledgeable in, or things they should be!

EX.

- “Tell me about yourself!”
- “How would you implement this tool?”

APPLICANT

Give yourself time to **think**. Wait ten seconds, and then answer. Feel free to ask clarifying questions to your interviewer!

A pink flower with a black outline is positioned in the top right corner of the slide.

RESOURCES

- Big interview
- Career services
- Your professors!!
- Anyone who volunteers in GWC/CSCI club (esp our alumni!)

THANK YOU!!

A pink ribbon with a black outline is tied in a bow and is positioned in the bottom left corner of the slide.
